

ENVIRONMENTAL PROTECTION AND WASTE MANAGEMENT POLICY

We are committed to protecting the environment, preventing pollution, and reducing our environmental impact. To achieve this, we:

- Comply with legal regulations and continuously strive to minimize our environmental impact.
- Carefully separate our waste at its source according to its group and hazard classification.
- Use hazardous substances and chemicals only when necessary and in appropriate amounts, knowing this reduces both environmental impact and waste quantity.
- Prefer materials with 'recyclable' and 'eco-friendly' labels to support nature conservation and seek opportunities for reuse.
- Use disposable materials such as paper, napkins, toilet paper, and packaging only as needed, to minimize waste left in nature.
- Store waste properly in designated areas according to its characteristics and ensure it is delivered to licensed/authorized companies within legal storage time limits, keeping accurate records.
- Conserve water, energy, and all natural resources, and share this sensitivity with our employees, guests, and suppliers.
- Measure our environmental performance, monitor it against targets, and strive for continuous improvement.
- Aim to educate our employees and increase their awareness about environmental protection.
